Liquid Polyamide(PA) Filter Bag

Item	1# PA Filter Bag	2# PA Filter Bag	3# PA Filter Bag	4# PA Filter Bag	
Size(mm)	180*450	180*810	105*230	105*380	
Size(inch)	7"*17"	7"*32"	4"*8"	4"*14"	
Tolerance	0.3-0.8(mm)				
Bag Area(m2)	0.25	0.5	0.056	0.115	
Filtration rate	25, 50, 75, 100, 200µm				
Material	100% Nylon filter cloth				
Neck material	The bag neck ring will be stainless steel or plastic				

Filtration pressure: 1.03-1.72(kg/cm²)

Liquid Nylon filter bag can working below 110()

Nylon Filter bag is supported by an inside metal basket in the inside the bag filtration system. The fluid flow out after filtered by the bag, thus the impurity is intercepted in the filter bag.

Polyamide Filter Bag offer enhanced removal characteristics and improved strength and durability. Every filament in the weave has been extruded with a consistent yarn diameter, enabling the filtration structure to deliver exact pore openings.

The small liquid filter bag can filter large amount of liquid. The smooth surface of a monofilament is easily cleaned. The weave pattern ensures a low-pressure drop and consequently an uninterrupted flow. The filter system can continue to use after changing the filter bag.
