## Polypropylene(PP) Liquid Filter Bags

Item	1# PP Filter Bag	2# PP Filter Bag	3# PP Filter Bag	4# PP Filter Bag	5# PP Filter Bag
Size(mm)	180*450	180*810	105*230	105*380	150*509
Size(inch)	7"*17"	7"*32"	4"*8"	4"*14"	6"*20"
Tolerance	0.3-0.8(mm)				
Bag Area(m2)	0.25	0.5	0.056	0.115	0.3
Filtration rate	1, 5, 10, 25, 50, 75, 100, 200µm				
Material	100% PP(Polypropylene) filter media				
Neck material	The bag neck ring will be stainless steel or PP(Polypropylene)				
Filtration pressure: 1.03-1.72(kg/cm <sup>2</sup> )					
Micron Polypropylene filter bag can working below 90( )					

### **PP Filter Bag, Liquid PP Filter Bag, Micron PP Filter Fabric manufacture by COX Filter Cloth.**

***PP Filter Bag(Micron Polypropylene Filter Fabric)*** have a lower fiber release, more defined pore size and greater retention efficiency than other filter media(filter bag).

***Liquid PP filter bag*** offer high efficiency filtration and have a high solids catch capacity. COX Filter Cloth produce micron Polypropylene filter bags have their outside surface singed or glazed to prevent fabric fiber from the bag getting into the clean, filter process media.

***Micron PP filter bags*** are generally compatible with most fluids except those considered aromatic solvents or strongly alkaline. Liquid PP filter fabrics(liquid PP filter bags) are recommended for prefiltering acids, aqueous and most solvent solutions. They are also used as a final filter for noncritical filtrations to reduce costs. Needle felt micron Polypropylene filter bags can be used at temperatures below 90 .

***Micron Polypropylene Filter Bags manufacture by needle felt PP filter fabrics. PP micron filter fabric select high quality Polypropylene material 1, 5, 10, 25, 50, 75, 100, 200micron filtration rate are available and standard size is 7" x 17", 7" x 32", 4" x 8", 4" x 14" and 6" x 20"***
